

GRANT GONNERMAN

(515) 402-7998 • gonnerman.grant@gmail.com • www.linkedin.com/in/grant-gonnerman/

SUMMARY

Data analyst with 2+ years of professional experience in statistical analysis, predictive modelling, and data visualization, transitioning to a data science role. Proficient in Python, R, and SQL with a proven ability to deliver actionable insights that drive business outcomes.

SKILLS

- **Data Science/Machine Learning:** Statistical Analysis, Predictive Modeling, Regression, Classification, Clustering, Deep Learning, TensorFlow, NLP, XGBoost, CatBoost, LightGBM, Optuna, Transformers
- **Programming:** Python (pandas, NumPy, scikit-learn), R, SQL
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Tools & Platforms:** SQL, AWS (SageMaker, S3), GitHub, Excel

EDUCATION

Master of Science (MS), Analytics
August 2024-April 2026

Grand View University
GPA: 4.0/4.0

Bachelor of Arts (BA), Computer and Data Science
Minor: Mathematics and Statistics

Grand View University
GPA: 3.52/4.0

WORK EXPERIENCE

Farm Bureau Financial Services, West Des Moines, IA

P/C Competitive Analyst I, October 2023-Present

- Presented actionable insight from analyses to actuarial teams, influencing pricing strategies.
- Designed and automated recurring data cleaning processes using R and SQL, reducing turnaround time by 75% for marketing predictive models.
- Optimized and automated existing processes to improve efficiency and turn around on scheduled requests from pricing teams.
- Monitored, investigated, documented, and resolved unexpected issues in data sources and outputs.
- Identified, investigated, and communicated industry developments and trends through filing research.

The Wittern Group, Clive, IA

Data Analyst Intern, September 2023-December 2023

- Developed and maintained Power BI Dashboards to visualize key business metrics, improving decision-making for manufacturing, sales, and shipping departments.
- Captured, transformed, managed, and stored data using SQL ensuring data integrity for reporting.
- Collaborated with cross-functional teams to identify and address data needs, enhancing operational efficiency.

PROJECTS

Optimal Fertilizers Prediction Model (2025)

- Build a multi-class classification model using Python (scikit-learn, pandas) to predict optimal fertilizers for an agricultural dataset in a Kaggle competition.
- Applied ensemble boosting models to achieve a MAP@3 score of .36 scoring in the top 20% of competitors.

Customer Churn Prediction with Sentiment Analysis (2025)

- Developed ensemble ML models using Python to predict telecom customer churn, integrating tabular data with NLP sentiment analysis from AI-generated feedback via transformers
- Achieved F1 scores up to 0.82 (a 20-30% improvement over baselines without sentiment), with strong recall for identifying at-risk customers through hyperparameter tuning via Optuna.
- Conducted EDA to uncover key churn drivers like contract type, payment methods, and service add-ons, enabling prescriptive retention strategies for subscription-based businesses.
